

Door Transition Rollers

Increase transfer rates between trucks and conveying operations.

Designed to assist with the loading and unloading of delivery trucks, covering the gap between door or truck and transport conveyor. Can be mounted on T-rails adjacent to the conveyor to allow the unit to traverse to several different stations. Stores in upright position to allow movement on platform.

Manual **boom extension** provides appropriate length of roller conveyor surface to speed up load and unload

Support legs adjustable to load, unload or flat position

Mounted on rails to accommodate several stations

Stores in **upright position** to allow movement on platform
